GREEN TIP #108 : *Earth Day*

Earth Day is held every year on April 22nd to bring awareness of our environment. On April 22, more than one billion people around the globe will participate in Earth Day 2019. This year Earth Day Network is focusing on protecting species, plants and animals alike. All plants and animals are intertwined in the web of life. Without them, our own species might not survive. People of all nationalities and backgrounds will voice their appreciation for the planet and demand its protection. Together we will stand united for a sustainable future and call upon individuals, businesses, organizations, and governments to do their part.

Earth Week April 22- 28 is also Pitch-In Canada week which leads up to our **Annual City Wide Spring Clean Up** on April 28th. Hundreds of thousands of Canadians show their concern for the environment and their communities each year by participating in PITCH-IN CANADA projects to: refuse, reuse, recycle and properly dispose of waste; clean up and rejuvenate local neighborhoods, green spaces, ravines, waterways and illegal dump sites; restore habitats; and to establish composting and recycling projects.

We would like to call you to **action** to: keep communities clean and beautiful and to restore and maintain a healthy environment by participating this year by picking up litter around your business and encourage your patrons to put "litter in its place"!

Free Pitch-In bags and gloves are available by contacting REAPS.
