Greening Your Office

...one tip at a time!

We care about the environment and we know you do too. Your office is a great place to make little changes that make a big difference. Here are some ideas to help you do just that. Provided monthly by R.E.A.P.S., we hope they inspire you to create change!

GREEN TIP #98:
June 2018

Green Transit

Transportation is essential during the work week. There are a few ways to make you commute to work greener. The most sustainable way to commute would be to walk or bike to work.

The PG Cycling Club has hosted Bike to Work week for 8 years. Bike to Work week is (INSERT DATE); sign up your coworkers and track your kilometers to win cycling related prizes.

If walking or biking is not an option, take the bus or carpool with your coworkers or family. Take advantage of free bus fares when the air quality index is high. Public transit emissions are low per person compared to a personal vehicle.

Free Fare for Clean Air

The City of Prince George offers free transit on days when the Ministry of Environment issues air advisories. Transit is free starting at midnight the day the air advisory is issued until midnight the day the advisory ends.

Single occupancy vehicles are the least sustainable way to commute to work unless it is a hybrid or electric vehicle. Vehicles carrying only one

person cause traffic congestion. Try to carpool with your coworkers! **8 billion** gallons of gas would be saved if every commuter car in the U.S. carried just one more person.
