

**Hello** friends! Wilma the worm here! Spring has almost sprung and Earth Day, April 22, is approaching fast! The red wigglers have been doing their part for the environment, eating up your lunch wastes and providing nature with some pretty splendid soil. But, I'm just a little bit curious as to what you have been doing to better our environment? Have you been practicing your three R's: Reduce, Reuse, Recycle? Well, I certainly hope so, because the Worm Lady needs your help in promoting environmental awareness! She is challenging you to create a **BIG** and **BRIGHT** poster with exciting new ideas that relate to environmental concerns happening **ALL** around the world. Posters are due April 15th and will be displayed at the Main Public Library from April 17th to 30th. Here are some fun Earth Day games and crafts to try out!

## Earth Jug Planters:

### What you'll need:

- 1 sheet light blue felt
- 2 sheets green felt
- 5 or 6 cotton balls
- White craft glue
- Gallon plastic milk jug
- Scissors or craft knife
- Potting soil
- Small rocks
- Seeds

 WORLD

### How to make it:

1. Cut blue felt into 1" x ½" strips. Set aside. Cut continents from green felt.
2. Have an adult use scissors or a craft knife to cut the top of the jug off. Make sure not to cut off the handle.
3. Glue the continents onto the jug. You do not have to be precise, let children glue them wherever they please.
4. Use the blue strips of felt to cover the remaining areas of the plastic jug.
5. Pipe some white craft glue onto the jug over the different land masses to create the clouds. Pull cotton balls apart and spread out onto the glue.
6. Have an adult turn jug upside down and poke several holes into the bottom for drainage.
7. Turn right side up, add a couple handfuls of small rocks to the bottom, then fill with potting soil. Plant seeds as instructed on package.
