REAPS GARDEN VISITS

Classes are welcome to come visit our Compost Demonstration Garden by Fort George Park (1950 Gorse St.). They can see where Wilma and her worm friend's live, how composters work, see a variety of different plants and do an activity related to gardening, bugs, composting, or recycling.

For more info or to book a tour, contact REAPS @250-561-7327 or email garden@reaps.org

SPRING CRAFT IDEAS

<http://crafts.kaboose.com/holidays/seasons/spring/>

Start your own garden from seeds!

Children love watching the magical process of seeds developing into young plants. Using any container and a little garden soil, plant seeds, add water and watch them grow! Use the seeds from oranges or dates or other kitchen fruit, or buy flower & veggie seeds at your local garden centre.

Thanks to all the students who made posters for Earth Day! They were displayed at the public library from April 17 - 30 and looked fabulous up on the windows for everyone to see!
