

# REAPS READER

Have you helped the environment today?

Recycling isn't only important on Valentine's Day, but each and every day! Paper, metal and glass can all be saved from the landfills if you take them to a recycling depot. Houses, offices, and classrooms can all have recycling program; call REAPS at 561-7327 to get more info about recycling activities and ideas.

This Valentine's Day, make recycled cards by cutting out the patterns below, colouring them, and gluing them to your card!

In partnership with Science World's Scientist and Innovators in the School (SIS) program, REAPS school program is supported by the Program for the Awareness and Learning of Science (BC PALS) thanks to the province of British Columbia through the Ministry of Education.
