Have you helped the environment today?

Around a billion Valentines are sent each year globally, making Valentines Day the second largest card giving holiday, behind Christmas. That means big business and a big impact on the environment. If those billion cards were laid out end to end, they would stretch around the earth 5 times!! That's a lot of trees!

Tips to keep your Valentines Day green as can be!

1. Send E-Cards to loved ones to avoid paper wasting.
2. Send recycled cards.
3. Give locally grown flowers.
4. Give gift certificates.

Earth Day!

- *Posters are due April 10th*
- *Earth Day is April 22nd.*

True and false answers!

1. False! Baby worms are not born. They hatch from cocoons smaller than a grain of rice.
2. False! If a worm is cut in half, all you get is a dead worm!
3. True! Worms eat their own body weight in food daily.
4. False! The earthworm does not have lungs and instead uses its skin to breathe.
5. True! Are a gardener's best friend.
